

Blueberry Systems and Advantage Credit Partner to Streamline Mortgage Loan Originations

-Seamless access to innovative credit reporting tools available to RELAY™ users-

Evergreen, Colo., Jan. 23, 2012 – [Blueberry Systems, LLC](#), a provider of advanced technology solutions to the mortgage and financial services industries, announced a strategic partnership with leading mortgage credit reporting company, [Advantage Credit Inc.](#)

Through the partnership, Advantage Credit customers will now have preferred access to Blueberry Systems' suite of scalable, robust mortgage technology solutions designed to give lenders maximum flexibility in securely managing their entire loan production pipeline.

In turn, users of Blueberry Systems' RELAY loan origination system (LOS) can now seamlessly access credit reporting products provided by Advantage Credit, enabling them to more effectively make loan decisions and more efficiently process and close loans.

"Providing a very high level of service has always been the focus for us at Advantage Credit Inc.," said Jim Kaiser, sales director of Advantage Credit Inc. "Through this integration, our customers will experience enhanced workflow integration while lowering technology and overhead costs. We are excited to partner with Blueberry Systems and look forward to the benefits it will provide the mortgage industry."

"For 18 years, Advantage Credit has provided extraordinary credit reporting tools and resources to the mortgage industry, and we at Blueberry Systems are excited to be working with them," said Lloyd Booth, president and COO of Blueberry Systems. "Providing our customers access to industry-leading credit reporting services will enable them to streamline processes and increase efficiencies, which will ultimately result in greater productivity."

About Blueberry Systems

Based in Greenwood Village, Colorado, Blueberry Systems, LLC, was founded in 2005 to provide software solutions, services and consulting to the financial services industry. Relay™, the company's flagship technology, is a highly flexible, fully customizable loan production platform that enables lenders to seamlessly and easily integrate disparate technology solutions.
